WORK EXPERIENCE:

Jr. Software Engineer| WebCraftian Labs
Austin, TX (remote) | 2025-present

- Develop reusable, high-performance React components using TypeScript and Tailwind
- Ensure code reliability by implementing unit testing with Jest.
- Currently implementing automated testing using Selenium

Associate Software Engineer| Sony PlayStation (SIE)
San Francisco, CA (remote) | 2021-2025

- Developed responsive, partner-facing web applications using React, TypeScript, and Sass.
- Integrated and consumed RESTful API's, implemented CI/CD pipelines using Jenkins to automate deployment.
- Designed and executed automated test suites using Selenium WebDriver for PS5.
- Monitored daily JUnit tests, reported root failure causes
- Created new documentation suite for onboarding engineers

Apprentice | Sand + Zinc
Oslo, Norway | March 2020-April 2021

- Mentored by Øyvind Hagberg while mastering front-end foundations (HTML, CSS, JS, testing)
- Shadowed senior engineers to understand real-world development workflows
